Correct Answer: C

QUESTION 2

To help thwart unauthorized access to ID files in the ID vault, you can choose to require which of the following?

- A. That someone with password reset authority approves all ID downloads
- B. That only group names are placed in the vault security document in the Domino server
- C. That the person fills out a download request in the vault to be approved by a vault manager
- D. That the ID vault be encrypted with a secret encryption key shared with only the proper administrators

Correct Answer: A

QUESTION 3

To utilize Domino Configuration Tuner, the person running the tool must have which of the following rights?

- A. At least Designer access to the Domino Directory as well as Read access to the Domino server log files
- B. At least Read access to the Domino Directory as well as "View console access" as defined in the server documents
- C. At least Read access to the Domino Directory as well as "View only administrators" access as defined in server documents
- D. At least Editor access to the Domino Directory as well as "Full access administrators" access as defined in server documents

Correct Answer: C

QUESTION 4

The router in Domino 8.5 utilizes cached and additional copies of messages to be delivered. How is this approach applied to a message destined for multiple recipients?

- A. The router opens each full note to discover the additional recipients
- B. The note is copied in the mailbox and prepared for delivery by the router
- C. Additional copies of this message are made as needed for multiple recipients
- D. The message is delivered by the router to one individual, and then the router queries the mailbox file for the next recipient

Correct Answer: C

QUESTION 5

The Domino Configuration Tuner database in your environment contains outdated rule sets. In which of the following ways are new rules applied?

- A. The rules must be manually copied into your existing database
- B. The new template design is retrieved from Lotus and applied to the database with the new rules
- C. The new rules must be manually created for your environment from the descriptors provided by Lotus
- D. The Domino Configuration Tuner database must be replaced with a new version to apply the new rule sets

Correct Answer: B
