QUESTION 1

Sarah needs to hide an input control that holds temporary data and access its value with client-side JavaScript. How can she accomplish that task?

A. She deactivates the visible property of the control, then the control itself is not visible, but she can access it with JavaScript.

B. She sets the loaded property of the input control to false, then the control itself is not visible, but she can access it with JavaScript.

C. She has to surround the input control with a
 section and set the display attribute to none.

D. She goes into the source code and precedes the code for the input control with "//".

Correct Answer: C

QUESTION 2

Dierdre is periodically asked to update the Readers field in documents created with the SalesOrder form. If a person\\'s name changes, they are no longer able to access documents they\\'d been able to access in the past. Dierdre would like the Readers fields to be automatically updated when someone\\'s name has been changed in the Domino directory. How can she do this?

A. Open the Security tab of the SalesOrder Form properties. Place a checkmark next to "Enable adminp updates".

B. Open the Advanced tab of the database ACL. In the selection list for Action, choose "Modify all Readers and Authors fields".

C. Open the Security tab of the Database properties. In the selection list for Administration Actions, choose "Update all Readers and Authors fields".

D. Ask a Notes Administrator to enable "Maintain Reader/Author field consistency" on the Security tab of the server document for her application server.

Correct Answer: B

QUESTION 3

Monica has bound the view named "Open invoices" into her XPages application, which is accessible as view1. For the convenience of the user, she likes to display the total amount of all invoices. How can she calculate this amount?

A. var total = view1.getItemSumDouble (\\'amount\\');

B. var allDocs = view1.AllDocuments();var total = allDocs.AddValues(\\'amount\\');

C. var total:double = 0;var doc:NotesDocument = view1.getFirstDocument();while(doc != null){total = doc.getItemValueDouble(\\'amount\\') + total;var tmpdoc:NotesDocument = view1.getNextDocument ();doc.recycle();doc = tmpdoc}

D. var total:double = 0;var doc:NotesDocument = view1.getFirstDocument();var item:NotesItem;while(doc != null){item = doc.getFirstItem(\\'amount\\');total = item + total;var tmpdoc:NotesDocument = view1.getNextDocument();doc.recycle();doc = tmpdoc}

Correct Answer: C

QUESTION 4

Jim is looking at the Properties dialog box for an agent. Which one of the following best describes the use of the "Allow user activation" option?

A. Allows users with Editor access or above in the ACL to run an agent

B. Allows users with Author access or above in the ACL to run an agent

C. Allows users with Editor access or above in the ACL to enable an agent

D. Allows users with Author access or above in the ACL to enable an agent

Correct Answer: C

QUESTION 5

Melissa is modifying her Lotus Notes application to use XPages and wants to reuse the forms that they have already, because there are lots of validations done on the fields. How can she use the existing form logic in the XPage?

A. There is no need to worry because the form logic that is already in the form is automatically used anyway, because the XPage is bound to theform.

B. Using the Run Form Validation options, she can set all of the form logic to be triggered operations for on document load or on document saveonly.

C. There is no way to reuse that form logic that is already in the form, so it must all be rewritten into the XPage.

D. Using the Run Form Validation options, she can set all of the form logic to be triggered operations for on document load, on document save, orboth.

Correct Answer: D
