QUESTION 1

Which three types of views are available in IBM Sterling Selling and Fulfillment Suite Application Console?

- A. List View
- B. Menu View
- C. Detail View
- D. Query View
- E. Search View
- F. Display View

Correct Answer: ACE

QUESTION 2

The system administrator of a company has been asked to implement a change request to an existing solution to let orders in the Backordered status to be cancellable. If an order is in any other status, cancellations should be disallowed. How should the system administrator achieve this?

- A. The system administrator should use the Sterling Business Center console to configure the order modification business rules.
- B. The system administrator should use the Order Modification Rules present within the Applications Manager to configure the Backorderedstatus to allow the order to be canceled.
- C. The system administrator does not have to do anything since orders in the backordered status will be automatically canceled by IBM SterlingOrder Management without any special configuration.
- D. The system administrator should implement the beforeChangeOrder User Exit of the changeOrder API in order to check for permissible orderstatuses. If the order is not in the Backordered status, an exception should be thrown from the User Exit.

Correct Answer: B

QUESTION 3

The IBM Sterling Selling and Fulfillment Suite deployment is giving a very high response time. The users of the Application Consoles have difficulty performing their tasks because of the long delay in screen loads and updates. What are two possible reasons?
