QUESTION 1

A major international financial firm has clients in over 35 countries, including the U.S. and Japan. A requirement exists to standardize all addresses and validate the U.S. and Japanese physical addresses.

How can this be accomplished?

- A. Use AVI to process all addresses within the single source.
- B. Use USAC to certify the U.S. addresses, AVI for the Japan addresses and custom rule sets for the remaining countries.
- C. Filter all the records by country. Use AVI for the U.S. and Japan and domain-specific rule sets for the remaining countries.
- D. Filter U.S., Japan and remaining countries into individual files. Process the U.S. and Japan addresses through AVI and use MNS for the remaining countries.

Correct Answer: A

QUESTION 2

What would happen if a special character is included in the SEPLIST and not in the STRIPLIST?

- A. That special character will be ignored.
- B. You will get an error when you test a statement.
- C. The token class for that character becomes the character itself.
- D. You need to enclose in double quotes any special characters in the SEPLIST that is not in the STRIPLIST.

Correct Answer: C

QUESTION 3

Which statement is true regarding Quality Stage data survivorship?

- A. Survivorship is used to create groups of duplicate records.
- B. The Survive stage is used to mark records as possible duplicates.
- C. The Survive stage is used after matched record groups have been identified.
- D. The Survive stage can be used to correct and identify unhandled data from the Standardize stage.

Correct Answer: C

QUESTION 4

When exporting a rule set to a .dsx file, what check box options should be selected?

- A. All check boxes are selected.
- B. No check boxes are selected.
- C. The Exclude Read Only items check box is selected and the Include Dependent Items check box is cleared.
- D. The Exclude Read Only items check box is cleared and that the Include Dependent Items check box is selected.

Correct Answer: A

QUESTION 5

What two rule groups are needed for rule sets?

- A. A rule group for rules that you want to apply to split a domain.
- B. A rule group for rules that you want to apply to records after all other actions.
- C. A rule group for rules that you want to apply to records before all other actions.
- D. A rule group for rules that you want to apply to records as they read a lookup table.
- E. A rule group for rules that you want to apply copies of records before all other actions.

Correct Answer: CD
