Correct Answer: A

QUESTION 5

A major international financial firm has clients in over 35 countries, including the U.S. and Japan. A requirement exists to standardize all addresses and validate the U.S. and Japanese physical addresses.

How can this be accomplished?

A. Use AVI to process all addresses within the single source.

B. Use USAC to certify the U.S. addresses, AVI for the Japan addresses and custom rule sets for the remaining countries.

C. Filter all the records by country. Use AVI for the U.S. and Japan and domain-specific rule sets for the remaining countries.

D. Filter U.S., Japan and remaining countries into individual files. Process the U.S. and Japan addresses through AVI and use MNS for the remaining countries.

Correct Answer: A
