- C. ISO code supplied by the USPREP rule set.
- D. ISO code supplied by the US Address rule set.

Correct Answer: C

QUESTION 2

Which statement about the jobs used by the Match Specification Setup Wizard is true?

- A. The jobs must be created.
- B. The jobs must be imported.
- C. The jobs exist for only One-source individual match.
- D. The jobs are created in the repository at installation time.

Correct Answer: A

QUESTION 3

What would happen if a special character is included in the SEPLIST and not in the STRIPLIST?

- A. That special character will be ignored.
- B. You will get an error when you test a statement.
- C. The token class for that character becomes the character itself.
- D. You need to enclose in double quotes any special characters in the SEPLIST that is not in the STRIPLIST.

Correct Answer: C

QUESTION 4

You added a new field to matching fields of an existing match specification and provisioned all match specification components. Then you ran the job but it failed immediately. The input data size is 2G bytes and the job worked without any issues before you modified.

What is most likely the cause of the problem?

- A. Lack of physical memory.
- B. Lack of scratch disk space.
- C. The job needs to be re-compiled.
- D. The frequency file needs to be re-generated.

Correct Answer: A

QUESTION 5

Once changes are introduced in a Rules Set, which option confirms the new rules set works properly with your data?

- A. Run the Rules Tester.
- B. Have users check manually.
- C. Check the Unhandled tokens.
- D. Run the job again and confirm results.

Correct Answer: D
