QUESTION 1

Records in a source file must be aggregated for further processing. Which two conditions would require the use of a Transformer stage instead of or in addition to an Aggregator stage? (Choose two.)

- A. The data hasn't been sorted or grouped.
- B. A global aggregation across all partitions is needed.
- C. The aggregation is a custom formula for your enterprise.
- D. Aggregation results outside of a certain range need to be flagged as abnormal.

Correct Answer: CD

QUESTION 2

If you do not alter any of the Format settings, the Sequential File stage will produce a file with what three types of format? (Choose three.)

- A. Rows are delimited by a DOS newline.
- B. Rows are delimited by a UNIX newline.
- C. All columns are delimited by a comma.
- D. Variable length columns are contained within double quotes.
- E. All columns are delimited by a comma, except for the final column in a row.

Correct Answer: BDE

QUESTION 3

Your job design calls for using a target ODBC Connector stage. The target database is found on a remote server. The target table you are writing into contains a single column primary key. What are the three "Write mode" properties that allow the possibility of multiple SQL actions? (Choose three.)

- A. Join then update
- B. Truncate then add
- C. Insert then update
- D. Delete then insert
- E. Update then insert

Correct Answer: CDE

QUESTION 4

You need to find the differences between the jobs in the Test project and their older version in the Production project. You discover that the Production project is on another domain. What feature would find the differences in a job that is in a project on a different domain?

- A. Cross Domain Compare
- B. Cross Project Compare
- C. DataStage Version Control
- D. Export from the other domain and import into a project in the same domain as the one you are working in.

Correct Answer: B

QUESTION 5

Which statement is true about the Web Services Pack?

- A. Web Services Pack generates a WSDL.
- B. Web Services Pack makes a service request using SOAP.
- C. Web Services Pack communicates by Enterprise Java Beans.
- D. Web Services Pack is configured from within the Information Services Director application.

Correct Answer: B
