⚙ **365 Days** Free Update

⚙ **800,000+** Satisfied Customers

QUESTION 1

How is the time that an agent waits for log records to be flushed to disk calculated?

A. LOG_END_TIME divided by TOTAL_COMMITS

B. LOG_WAIT_TIME divided by TOTAL_COMMITS

C. LOG_WRITE_TIME divided by TOTAL_COMMITS

D. LOG_FLUSH_TIME divided by TOTAL_COMMITS

Correct Answer: C

QUESTION 2

Which statement describes adaptive row compression?

A. Adaptive compression allows for use of customized compression dictionary creation algorithms.

B. Adaptive compression maintains a dynamic and ever changing table-level row compression dictionary.

C. Adaptive compression incorporates both classic table-level row compression and page-by-page based row compression.

D. Adaptive compression incorporates four compression approaches: tablespace-level, table-level, page-level, and bufferpool-level.

Correct Answer: C

QUESTION 3

Which statement about adaptive compression is true?

A. When you enable adaptive compression for a table, you enable it for the entire table, even if the table contains more than one partition.

B. You can specify that tables be compressed by using either a table-level dictionary only, page-level dictionaries only, or both table-level andpage-level dictionaries.

C. Adaptive compression can only be used to compress base tables, partitioned tables, and temporary tables; MQTs, typed tables and stagingtables cannot be compressed.

D. Adaptive compression uses a page-level dictionary-based compression algorithm to compress data based on repeating patterns found within asampling of data from one extent.

Correct Answer: A

QUESTION 4

Which is the suggested way to restore a database with a subset of its original table spaces?

A. Execute the RESTORE DATABASE command with the REBUILD WITH option and specify the set of table spaces that are needed.

B. Execute the RESTORE DATABASE command with the REBUILD WITH ALL TABLESPACES option and specify the set of table spaces that areneeded.

C. Execute the RESTORE DATABASE command with the REBUILD WITH ALL TABLESPACES IN IMAGE option and specify the set of table spacesthat are needed.

D. Execute the RESTORE DATABASE command with the REBUILD WITH ALL TABLESPACES IN DATABASE option and specify the set of tablespaces that are needed.

Correct Answer: A

QUESTION 5

Which statement about updating index statistics with the RUNSTATS command is true?

A. It requires a full index scan.

B. It can be accomplished by sampling the index.

C. It must be executed against all indexes for the table.

D. It cannot be accomplished without scanning the associated table.

Correct Answer: B
