QUESTION 1

To build an Eclipse Java project in SCLM, the source must be created and the project must be added to SCLM. What else is required to perform this build?

- A. a build script for the Java project
- B. an ARCHDEF for the Java project
- C. a build script for the project containing the definitions of the ARCHDEF
- D. a build script for the project that is referenced by the ARCHDEF

Correct Answer: D

QUESTION 2

When using Rational Developer for System z, which feature can you use to deploy a SCA bundle to the CICS runtime?

- A. the CICS SCA generation properties file
- B. the Installation Manager
- C. the Application Deployment Manager (ADM) manifest file
- D. the CICS Configuration Manager

Correct Answer: C

QUESTION 3

When creating a Menu Manager menu in Rational Developer for System z, which elements are unsupported in V7.6?

- A. Actions
- B. Icons
- C. Separators
- D. Cascaded submenus

Correct Answer: B

QUESTION 4

While editing a C/C++ source file inside a z/OS UNIX subproject using the Remote C/C++ editor, users can perform Open Declaration to open the declaration of a selected C/C++ language element. How is the search path for the declaration determined for this open file?

- A. by the system and local include paths in the build options of a Target environment
- B. by the C options fields or C++ option fields that are found in the Target environment
- C. by the global path variables defined in the Target environment
- D. by the Dependency locations field of the editor options that are found in the Target environment

Correct Answer: A

QUESTION 5

When a user runs the Build action (or "Build 390 Stored Procedure" in earlier versions) from the Data Project Explorer, the build utility is invoked on the remote system and builds the executable form of the stored procedure. This process includes the compilation of the source code, the linkage of the load module, the binding of the DB2 package, and what else?

- A. validation of the load module built
- B. dropping of stored procedure if one with the same name already exist
- C. registration of the stored procedure in the DB2 catalog
- D. running of the stored procedure upon a successful build

Correct Answer: C
