#### QUESTION 1

What information does difference displayed in the Request / Response tab provide?

- A. the difference between two tests
- B. how the vulnerability was resolved
- C. how AppScan constructed the test HTTP request
- D. how the Web application page has been modified from its previous version

Correct Answer: C

---

#### QUESTION 2

You are scanning a Web site in a pre-production environment. You notice that your scan is running very slowly and there are numerous communication errors. What would you do to resolve the problem?

- A. increase the number of threads and decrease the timeout limit
- B. decrease the number of threads and increase the timeout limit
- C. increase the number of threads and increase the timeout limit
- D. set the timeout to 0 for infinite timeout

Correct Answer: B

---

#### QUESTION 3

AppScan reported a large number of hidden files, which you know do not exist on your Web server. What is the likely cause?

- A. You did not define a custom error page.
- B. AppScan created all these files on the server.
- C. You did not exclude third-party domains.
- D. Somebody put the files on the server.

Correct Answer: A

---

#### QUESTION 4

Which statement is true about infrastructure vulnerabilities?

- A. They are caused by insecure coding and are fixed by modifying the application code.

- B. They are detected using application security scanners and exist in the Web application.
- C. They are known vulnerabilities and are fixed by modifying the application code.
- D. They exist in third-party components and are fixed by applying security patches.

Correct Answer: D

---

#### QUESTION 5

How does AppScan test a Web application?

- A. by sniffing network traffic
- B. by scanning the Web server host machine
- C. by performing a port scan
- D. by sending HTTP requests

Correct Answer: D
