QUESTION 1

A rapidly growing retail company recently outsourced their package delivery to a very reputable package delivery company. The two companies are integrated using SOA and Web services. However, the retail company is having customer satisfaction issues as the call center is not reliably calculating delivery dates. Which portion of the SOA Foundation is the focus to resolve this issue?

- A. Information Services
- B. Process Services
- C. Partner Services
- D. Interaction Services

Correct Answer: C

QUESTION 2

A company is implementing a new Web service within an SOA. The service will provide the ability to access customer details as part of a number of high-volume business processes. Which key quality assurance activity is needed as part of the Deploy phase of the SOA lifecycle?

- A. Assessment of existing services that are part of the same business processes.
- B. Modification of the service to match the defined business requirements if necessary.
- C. Testing to ensure that the service meets performance targets for the business processes.
- D. Tracking the service in the service registry.

Correct Answer: C

QUESTION 3

A company is implementing a new Web service to provide the ability to access customer details as part of a number of high-volume business processes within an SOA environment.

During the deploy phase of the SOA lifecycle, which key quality assurance activity should occur?

- A. Tracking the service in the service registry.
- B. Assessing existing services that are part of the same business processes.
- C. Simulating the business process to find the optimum path length to ensure maximum throughput.
- D. Testing to ensure that the service meets performance targets for the business processes.

Correct Answer: D

QUESTION 4

A company has started an ambitious SOA project as part of an enterprise modernization initiative. The SOA Designer has determined that their mainframe-based portfolio is a tightly coupled set of applications owned by different IT

organizations. In addition, the SOA executive sponsor is concerned that their mainframe portfolio and skill base will make the transition to SOA difficult.

What should the SOA Designer do?

- A. Deploy an Enterprise Service Bus (ESB) as a means for decoupling the applications and isolating organizational issues.
- B. Develop a detailed education roadmap for the application owners, developers and operations staff to ensure success.
- C. Suggest a pilot project to re-engineer one of the mainframe applications to use J2EE and SOAP on Unix to help develop SOA skills.
- D. Propose a Service Integration Maturity Model (SIMM) assessment to identify any potential organizational issues or skill mismatches in the project staff.

Correct Answer: D

QUESTION 5

A customer wants to create a View Statement Service. Data is stored in VSAM files on System z and the files can be large. The data is archived quarterly, so retrieval time can be significant. Furthermore, the legal view format can change over time.

How should the SOA Foundation be utilized to implement the View Statement Service?

- A. Interaction Services to Access Services via Enterprise Service Bus (ESB)
- B. Process Services with JCA to CICS/VSAM
- C. Business Application Services to Access Services via ESB
- D. Business Application Services with JCA to CICS/VSAM

Correct Answer: C
