Following Questions and Answers are all new published by IBM Official Exam Center

QUESTION 1

What can have the largest impact on the performance of an SOA?

A. Service granularity

B. Use of open standards

C. Service version management

D. Business monitoring of Key Performance Indicators (KPIs)

Correct Answer: A

QUESTION 2

How can a company enforce adherence to the SOA policies that have been defined?

A. Define and execute conformance checkpoints across the service life cycle.

B. Initiate and enable SOA governance communication, education and mentor plans.

C. Commit to a strategy for SOA in the context of the business goals and IT strategy.

D. Implement governance organizational structures such as architectural review boards, executive steering committees and Centers of Excellence (CoE) to ensure adherence.

Correct Answer: A

QUESTION 3

What describes the purpose of the Enterprise Service Bus (ESB) in an SOA?

A. It provides separation of concerns so that each service can be managed separately.

B. It provides a design that allows components to be changed with less impact to the consumer.

C. It allows a service consumer to make a service request without knowing the details of the operation.

D. It implements service functionality by integrating existing back end service functionality using routing and transformation logic.

Correct Answer: B

QUESTION 4

What is one purpose of an Enterprise Service Bus (ESB) in SOA management and governance?

A. It allows load balancing across multiple services.

B. It provides pre-built components called mediation primitives.

C. It hides interface details from Key Performance Indicators (KPIs).

D. Physically moving a service requires modification to all other components that use it.

Correct Answer: C

QUESTION 5

Which might cause a challenge to prioritizing, defining and funding services in SOA?

A. Services that support multiple projects and/or lines of business

B. Services that need to consider non-disruptive roll-out of changes

C. Services that are based on standards to allow for interoperability

D. Service requesters that are independent of the service implementation

Correct Answer: A
