QUESTION 1

A BPM application developer needs to build a Java Integration that has to invoke Java code, which is packaged in a JAR file. The developer has the additional requirement to ensure that the response from the invoked method is returned as an XML element.

What steps must the BPM application developer take in order to satisfy this requirement? The BPM application developer must:

- A. add the JAR file to the class path of the product installation and enable the translation of JavaBeans
- B. add the JAR file to the class path of the product installation and disable the translation of JavaBeans
- C. add the JAR file as a server file to the process application and enable the translation of JavaBeans
- D. add the JAR file as a server file to the process application and disable the translation of JavaBeans

Correct Answer: C

QUESTION 2

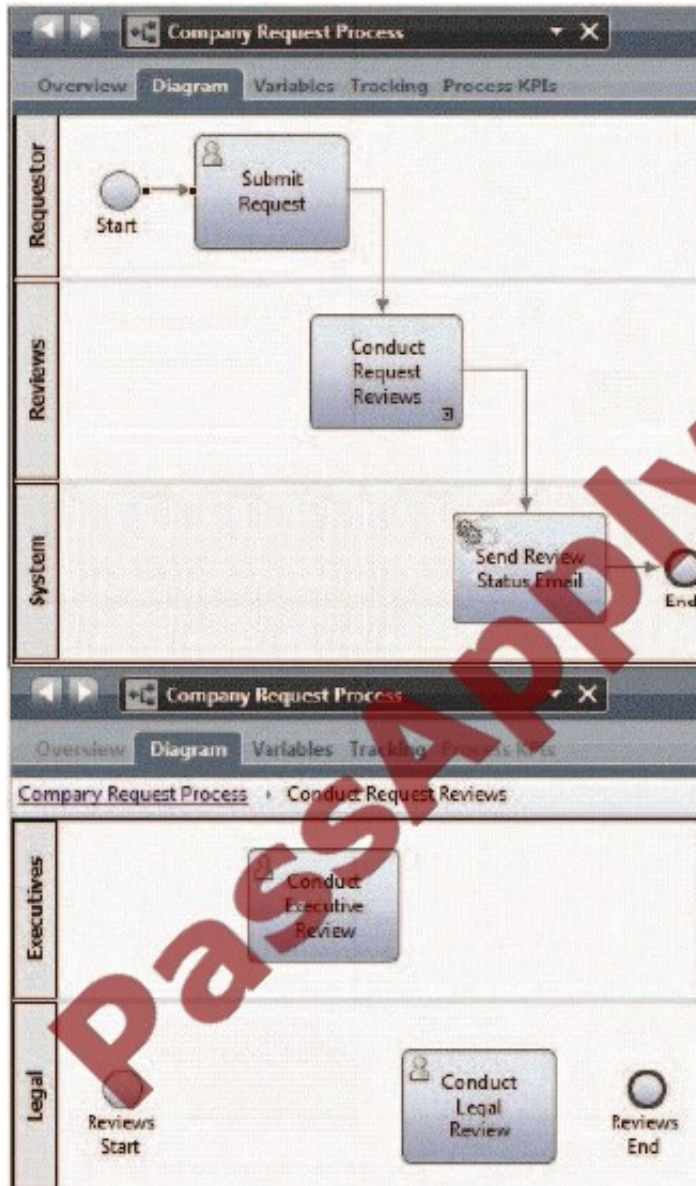

A BPM application developer has completed the development of a process application. The team lead has now directed the application developer to install the snapshot onto a staging server for additional testing before it is moved into production. Assuming the default Process Server settings are in place, what minimum level of access must the developer have in order to install the snapshot onto the staging server? The application developer must have, at a minimum:

- A. write access to the process application with no additional group membership.
- B. write access to the process application and must be a member of the process-center-install-group as defined in the 100Custom.xml file.
- C. administrative access to the process application with no additional group membership.
- D. administrative access to the process application and must be a member of the process-center-install-group as defined in the 100Custom.xml file.

Correct Answer: A

QUESTION 3

A company requires all requests to be viewed by a member of the Executive Leadership and a member of its Legal Department. These reviews must be executed independently of each other. Once these reviews are completed, an email is sent out to all relevant process stakeholders informing them of the outcome of the reviews. Review the following business process definition.

How should a BPM application developer model the remainder of the subprocess, "Conduct Request Reviews?"

- A. Draw two sequence flow lines from Reviews Start to Conduct Executive Review and Conduct Legal Review. From each review activity, draw a sequence flow to Reviews End.
- B. Draw a sequence flow line from Reviews Start to Conduct Executive Review. From Conduct Executive Review, draw a sequence flow line to Conduct Legal Review. From Conduct Legal Review, draw a sequence flow line to Reviews End.
- C. Draw a sequence flow line from Reviews Start to a Parallel Gateway. From the Parallel Gateway, draw two sequence flow lines to Conduct Executive Review and to Conduct Legal Review. From each review activity, draw a sequence flow line to Reviews End.
- D. Draw a sequence flow line from Reviews Start to an Exclusive Gateway. From the Exclusive Gateway, draw two sequence flow lines to Conduct Executive Review and to Conduct Legal Review. From each review activity, draw a sequence flow line to Reviews End.

Correct Answer: C

QUESTION 4

A BPM application developer needs to create a coach view to meet the following requirements:

1.The coach view must be able to be used to build several user interfaces. 2.The coach view must be able to be used to create other coach views. 3.The contents of an html element must be updated when the view\\'s data changes. What steps must the BPM application developer take in order to meet these requirements? Write code to intercept modifications to the view\\'s data and place it in the:

A. view event handler of the view instance and enable the view definition to be used as a template. A new coach view must be built using the template to support requirement 1.

B. view event handler of the view definition and enable the view definition to be used as a template. The template coach view can be used directly in coaches as well as other coach views.

C. change event handler of the view instance and enable the view definition to be used as a template. A new coach view must be built using the template to support requirement 1.

D. change event handler of the view definition and enable the view definition to be used as a template. The template coach view can be used directly in coaches as well as other coach views.

Correct Answer: D

QUESTION 5

After the completion of several tasks, an order shipping process for electronic devices must wait to receive a message from a separate inventory replenishment process before proceeding to an activity for order delivery.

How should the BPM application developer implement the receive message event?

A. As an Ad-hoc event.

B. As a message start event.

C. As an intermediate event in the process flow.

D. As an intermediate event attached to the order delivery activity.

Correct Answer: C
