QUESTION 1

A sales company wants to be able to report on the total amount of sales per region.

How can a BPM application developer capture this information so that the data can be reported on? (Choose two) The BPM application developer needs to use:

A. Autotracking

B. Shared Business Object

C. Exposed Process Value (EPV)

D. Service Level Agreement (SLA)

E. Custom Key Performance Indicator (KPI)

Correct Answer: AE

QUESTION 2

A BPM application developer has been called into a training session with a group of developers who are new to IBM Business Process Manager V8.0. The BPM application developer needs to describe the process of building an Ajax service to help the new developers complete their assignment.

What statement will the BPM application developer make regarding the process of building an Ajax service in the training session? Creating an Ajax service is:

A. similar to the process for creating other services, except they are created in the library area where User Interface library items are stored.

B. similar to the process for creating other services and just like other services, they are created in the library area where Implementation library items are stored.

C. different from the process for creating other services because they are coupled with the human service in which they are used. However, they are created in the library area where Implementation library items are stored.

D. different from the process for creating other services because they are coupled with the human service in which they are used. This is why they are created in the library area where User Interface library items are stored.

Correct Answer: A

QUESTION 3

A BPM application developer has been asked to provide guidance with the creation of a single coach for a financial company. This coach must: ?allow a business user to specify a stock symbol only once. ?provide the current value of the specified stock symbol. ?provide the current day\\'s trending data of the specified stock symbol. ?provide the current

week\\'s trending data of the specified stock symbol.

What guidance should the BPM application developer provide?

A. Within a human service, create a coach that prompts for a stock symbol and then pass the specified stock symbol to another coach that will display the stock\\'s information.

B. Within a human service, create a coach that includes a coach view for each of the company\\'s requirements and use the stock symbol\\'s coach view to build the user experience based on its configured boundary event.

C. Within a coach, use a custom coach view that is comprised of a number of different stock coach views and use JavaScript within the custom coach view\\'s event handlers to build the user experience based on a specified stock symbol.

D. Create a coach based on a template that uses a number of different stock coach views and use JavaScript within a Custom HTML component to build the user experience based on a specified stock symbol.

Correct Answer: B

QUESTION 4

A BPM application developer is developing assets at a company with the following BPM infrastructure:

A) One Process Center environment

-The BPM application developer has all security privileges required to access this environment

B) Three runtime environments- Test, Staging, and Production

-Each runtime environment is a two node, clustered environment

-They are all configured as "online" environments

-The BPM application developer has all security privileges required to access those environments The BPM application developer has all security privileges required to access those environments The BPM application developer has all security privileges required to access those environments

The BPM application developer has been asked to create a Saved Search in each environment using the Process Admin Console.

How many times must the BPM application developer open a Process Admin Console to make this change?

A. 1 time, since the Process Center environment\\'s Process Admin console manages all online environments

B. 2 times, once for the Process Center environment and once for the runtime environments

C. 4 times, since each environment has it\\'s own Process Admin console

D. 7 times, since each node in each environment has its own Process Admin console

Correct Answer: C

QUESTION 5

There is a requirement for a business process diagram to have two subsequent activities routed to the same user. During a demonstration, a business user notices that upon completing the first task they must return to their inbox to start the next task. The business user would prefer to have the second task automatically appear upon completion of the first task and asks the BPM application developer what options are available.

How should the BPM application developer respond? This can be configured by:

A. making a change to the 100Custom.xml file.

B. changing the first activity\\'s routing to "Last User in Lane".

C. changing the second activity\\'s routing to "Last User in Lane".

D. changing the implementation of the activity and selecting the "Automatically flow to next task" check box.

Correct Answer: D
