QUESTION 1

A development team is preparing to install Worklight V5.0 Studio in a multi-platform environment including Mac OS, Linux, and Windows workstations. Which installation method can be used on all three platforms?

- A. Eclipse Update Site
- B. IBM Installation Manager
- C. IBM Profile Management Tool
- D. IBM Plug-In Installation Wizard

Correct Answer: A

QUESTION 2

What are the steps to create an iOS native page?

- A. Create a new Objective C class, subclass UIViewController
- B. Create a new Objective C class, subclass UINavigationController
- C. Create a new Objective C class, make it partial class of the application's main ViewController
- D. Add UI layout to the existing ViewController

Correct Answer: A

QUESTION 3

What is a best way to keep an active server session alive?

- A. Alert user that session is about to expire and ask to perform some action to keep it alive
- B. Invoke any Worklight adapter procedure in the background ignoring the response
- C. Set heartbeat interval to a value lower than session timeout defined on Worklight server
- D. There is no way to keep session alive from the client. Server is the only entity that can control this

Correct Answer: C

QUESTION 4
