QUESTION 1

A web page in a Worklight mobile application invokes a native page using the following function call: `WL.NativePage.show("com.demo.NativePage", parm2, data)`; What needs to be passed to the native page in the `parm2` parameter?

- A. the name of an HTML error page that is displayed in case of error
- B. the function object that is called upon return from the native page
- C. the name of a native error-handler class that is invoked in case of error
- D. the URL of the web page that is displayed upon return from the native page

Correct Answer: B

QUESTION 2

Which mobile environments support the TabBar control? (Choose two)

- A. BlackBerry,
- B. Windows Phone
- C. iOS,
- D. Android

Correct Answer: CD

QUESTION 3

A Worklight mobile application named test has the following code:

In the `initOptions.js` file:

```
var wlInitOptions = {  
    heartBeatIntervalInSecs :20  
};
```

In the `test.js` file:

```
function wlCommonInit(){  
    document.addEventListener(WL.Events.WORKLIGHT_IS_CONNECTED, connectDetected, false);  
    document.addEventListener(WL.Events.WORKLIGHT_IS_DISCONNECTED, disconnectDetected, false);  
}  
  
function disconnectDetected(){  
    WL.Logger.activity("disconnect detected");  
}  
  
function connectDetected(){  
    WL.Logger.activity("connect detected");  
}
```

The developer sees the following message in the LogCat view when running the application:

```
"disconnect detected"
```

What is the cause of this behavior?

- A. The server is unreachable.
- B. The `heartBeatIntervalInSecs` is set to a value that is too low.
- C. The `heartBeatIntervalInSecs` is set to a value that is too high.
- D. The `serverSessionTimeout` value needs to be set to a value lower than `heartBeatIntervalInSecs`.

Correct Answer: A

QUESTION 4

Once a Shell developer completes developing her Shell components, what is the proper way to distribute it to inner application developers?

- A. Zipping the Worklight project and emailing it to inner application developers
- B. Committing the Worklight project to a Source Control Management system and telling inner application developers to use source code from it
- C. The Shell developer should not distribute the Shell component to inner application developers. They should send their inner applications to her in order to build them
- D. Sending the `.wshell` Shell bundle file to inner application developers

Correct Answer: D

QUESTION 5

Which authenticators are supported out of the box? (Choose three)

- A. Header authentication
- B. Persistent cookie authentication
- C. Form-based authentication
- D. Kerberos authentication

Correct Answer: ABC
