100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by IBM Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

A Power 720 is being used to build 2 environments: Test and Production, with 2 LPARs in each environment. Processor resources must be separated between the Test and Production environments to reduce possible contention, while still being able to share processor resources inside each own environment. What are the two features required, as a minimum, to accomplish this? (Select 2)

- A. IVM
- B. HMC
- C. PowerVM Express
- D. PowerVM Standard
- E. IVE
- F. IBM Systems Director

Correct Answer: BD

### QUESTION 2

After a hardware failure, a VIO server has been restored from a mkysyb image on a NIM server. When the VIO server boots, the client LPARs have no network access? What is the cause of this problem?

- A. The VIO server was configured to remain as a NIM client.
- B. The backupios command was not run correctly.
- C. Automatic device recovery is not supported by NIM restores.
- D. The client LPAR virtual network adapters have not been recreated

Correct Answer: A

### QUESTION 3

A POWER7 system has been recently installed and 4 uncapped shared processor LPARs have been defined.

Name	CPU	Min	Des	Max
PROD1	1	2	4	
PROD2	1	2	4	
DEV1	0.5	1	2	
DEV2	0.5	1	2	

The use of Multiple Shared Processor Pools has been decided upon for licensing and performance reasons.

The pools are as follows:

Name	Max proc.	units/reserved
Production	5	1
Development	3	1

When adding PROD1 to the Production pool via the command line, the following error is given "This operation is not allowed because the partition is using dedicated processors"

- A. POWER6 mode is enabled
- B. LPAR has not been powered on
- C. LPAR has been powered on
- D. The Pool has insufficient processor units

Correct Answer: B

#### QUESTION 4

A customer is planning to purchase a fully populated Power 795. There are 65 applications which need to run and all need an AIX 7 environment. The architect is considering whether to use an LPAR for each application or to use a single large LPAR and have a WPAR for each application.

What must be considered before creating the environment?

- A. There is a limit of 64 WPARs in any AIX V7 global environment.
- B. An activation key for LPARs with more than 128 processors is required.
- C. There is a limit of 32 Processors in a WPAR.
- D. Multiple IVE adapters are required to support all the partitions.

Correct Answer: B

Exam B

#### QUESTION 5

A user has accidentally deleted critical system files on an LPAR. Storage on the LPAR is provided using both vSCSI and NPIV. The administrator is preparing to reinstall the LPAR, but has concerns about the existing NPIV configuration. Which statement concerning WWPNS is correct?

- A. During the reinstall of AIX, the HMC will assign new WWPNS to the adapters.
- B. Assigned WWPNS are regenerated during a reinstall for boot devices, but preserved for secondary storage.
- C. Providing the configuration of the virtual Fibre Channel adapters remains unchanged in the LPAR profile, the existing WWPNS are preserved.

D. The virtual\_fc\_adapters LPAR attribute must be verified prior to the reinstall and suitably updated to preserve all existing WWPNS.

Correct Answer: C
