QUESTION 1

In CA IdentityMinder, which self-service actions can you perform using public tasks? (Choose two)

- A. Self-registration
- B. Modifying your profile
- C. Changing your password
- D. Resetting a forgotten password

Correct Answer: AD

QUESTION 2

You are deploying CA IdentityMinder on a 64-bit Windows system. Before you configure Active Directory password synchronization, you want to make sure that you meet the twin goals of maximizing security and minimizing synchronization issues. Which guideline should you follow?

- A. Configure CA IdentityMinder to check the history of recent changes to passwords.
- B. Enable CA SiteMinder rules to override rules in other accounts by configuring eta_pwdsync.conf.
- C. Make sure that the CA IdentityMinder password policy is stricter than the password policy of the endpoints.
- D. Use the 32-bit Password Synchronization Agent on 64-bit systems that require Federal Information Processing Standards (FEPS).

Correct Answer: C

QUESTION 3

CA IdentityMinder must integrate with CA SiteMinder in order to:

- A. automatically remove white space in passwords.
- B. add multiple regular expressions to a single password policy.
- C. prevent passwords that are all numeric using a regular expression.
- D. specify the maximum number of repeated characters in a password.

Correct Answer: B

QUESTION 4

What do you need to do before you create a report for a Connector Xpress custom endpoint?

- A. Use the SDK to create a custom report.
- B. Enable reporting for the custom endpoint.
- C. Write a custom report using Crystal Reports.
- D. Write a custom report using CleverPath Reporter.

Correct Answer: B

QUESTION 5

You are implementing CA IdentityMinder at Forward Inc., an international logistics company with headquarters in the United Kingdom. At Forward Inc., a single managed endpoint containing every person does not exist. However all users are contained in a payroll database, which can become the source of the global users for the provisioning directory. In this context, the payroll database is known as a:

- A. corporate store.
- B. primary endpoint.
- C. secondary endpoint.
- D. operational database.

Correct Answer: B
