QUESTION 1

While logged in as a tenant administrator you begin creating the user accounts for that tenant. You want to assign a specific role to an account. However, the role does not appear to be among the available roles. What is the likely reason for this?

- A. The role has not been created.
- B. The role was assigned to another tenant.
- C. You do not have permission to see the role.
- D. Only CA Technologies Services can perform this action.

Correct Answer: A

QUESTION 2

If you register a Data Aggregator data source, a system group named Collections will appear in CA Performance Center. Which feature characterizes collections?

- A. They are always modifiable.
- B. They are generally only used for report organization.
- C. They are not tenant-specific but are always global in scope.
- D. They are primarily used to control monitoring behavior using rules specified in monitoring profiles.

Correct Answer: A

QUESTION 3

When you are planning Data Repository backups, which factor should you consider?

- A. Best practice is to perform backups on a daily basis.
- B. Backups can introduce the risk of a simultaneous failure in Vertica.
- C. The database backup should be viewed as a best practice and not a requirement.
- D. The backup interval depends on the data loss tolerance of the enterprise customer.

Correct Answer: D

QUESTION 4

You are installing the Data Repository in a clustered configuration. What is the minimum number of hosts that you can use for your cluster?

- A. Two
- B. Three
- C. Four
- D. Five

Correct Answer: B

QUESTION 5

As the Global Administrator, you need to create a limited, non-administrative account for a particular data source. To perform this task, which sequence should you follow?

1.
Register the data source.
 2.
Begin the creation of the user account.
 3.
Assign the appropriate product privilege to the data source.
 4.
Assign a role based on CA Performance Management requirements.
- A. 1,2,3,4
 - B. 1,3,2,4
 - C. 2,3,1,4
 - D. 4,2,3,1

Correct Answer: B
