QUESTION 1

When you create a custom vendor certification, which steps do you need to perform? (Choose three)

- A. Select a metric family.
- B. Specify a vendor name.
- C. Define a metric expression.
- D. Create a notification profile.
- E. Select a management information base (MIB).

Correct Answer: ACE

QUESTION 2

In CA Performance Center, permission groups:

- A. Are always read-only copies of system or custom groups.
- B. Are custom groups that organize managed items for data access purposes.
- C. Are known as context groups until they are assigned to user accounts as permission sets.
- D. Are used to group users who have common access requirements to selected data sources.

Correct Answer: B

QUESTION 3

Which step enables you to validate the installation of CA Performance Center?

- A. Check that the Vertica database can be stopped and restarted.
- B. Run `ps -aef | grep java` and examine the running java processes.
- C. Check that the Data Collectors are able to connect to the MySQL database.
- D. Successfully log in to the CA Performance Center console from a supported web browser.

Correct Answer: D

QUESTION 4

In CA Performance Center, groups are organized in the Groups Tree. Which features characterize the Groups Tree? (Choose two)

- A. Its root level is called the Root Group node.
- B. It is used when an administrator manages groups.
- C. It includes the Defined Tenants sub-tree for groups in a tenant space.
- D. It includes a sub-node in the Defined Tenants sub-tree for Default Space groups.

Correct Answer: BC

QUESTION 5

As the Global Administrator, you need to create a limited, non-administrative account for a particular data source. To perform this task, which sequence should you follow?

1.
Register the data source.
 2.
Begin the creation of the user account.
 3.
Assign the appropriate product privilege to the data source.
 4.
