QUESTION 1

Which statement is true about using a burst key to burst reports?

- A. A burst key can be added to a crosstab report.
- B. A burst key can be added to a list report.
- C. A burst key can be added to a chart report.
- D. A burst key can be added to a map report.

Correct Answer: B

QUESTION 2

In Report Studio, an author creates the following report:

Product line	Product type	Revenue
<Product line>	<Product type>	<Revenue>
<Product line>	<Product type>	<Revenue>
<Product line>	<Product type>	<Revenue>

The author wants the report to show the total revenue generated by each Product line. How can the author accomplish this?

- A. In Query Explorer, change the Rollup Aggregate Function property for the Revenue data item to Total.
- B. In Query Explorer, change the Rollup Aggregate Function property for the Product line data item to Total.
- C. In the layout, group the Product line column and then add an aggregate row showing total revenue values.
- D. In the layout, group the Product type column and then add an aggregate row showing total revenue values.

Correct Answer: C

QUESTION 3

In the report shown,

The screenshot shows a report interface. At the top, there is a 'Bookmark' menu with a 'Product line' option selected. Below the menu, there is a table with four columns: 'Product type', 'Product name', 'Product description', and 'Product cost'. The table contains three rows of data, each with placeholder text '<Product type>', '<Product name>', '<Product description>', and '<Product cost>'.

Product type	Product name	Product description	Product cost
<Product type>	<Product name>	<Product description>	<Product cost>
<Product type>	<Product name>	<Product description>	<Product cost>
<Product type>	<Product name>	<Product description>	<Product cost>

users click on the Product line link to navigate to the specific product line in the list below. Users can also click on the Top link to return to the Product line list at the top of the report. Bookmarks are used to control this drill-through behavior. How is each of the drill-throughs defined for this report to function as described?

- A. Product line drill-through: bookmark source type = Text, where Text =Top;Top drill-through: bookmark source type = Data Item Value, where Data Item = Product line
- B. Product line drill-through: bookmark source type = Data Item Label, where Data Item = Product line;Top drill-through: bookmark source type = Text, where Text =Top
- C. Product line drill-through: bookmark source type = Data Item Value, where Data Item = Product line;Top drill-through: bookmark source type = Text, where Text =Top
- D. Product line drill-through: bookmark source type = Text, where Text = Top;Top drill-through: bookmark source type = Data Item Value, where Data Item = Product line

Correct Answer: C

QUESTION 4

The sales department requires a report that numerically compares the gross profit generated for all product lines in each territory. In Report Studio, which is the most appropriate report type?

- A. List
- B. Chart
- C. Crosstab
- D. Map report

Correct Answer: C

QUESTION 5

Which statement about the tabular data retrieved by Report Studio queries is true?

- A. Tabular data includes a column for each data item in the query. No grouping is applied to the tabular data.
- B. Tabular data includes a column for each data item in the query. Grouping applied in the report layout is also applied to the tabular data.
- C. Tabular data can only include columns for data items that appear in the layout. No grouping is applied to the tabular data.
- D. Tabular data includes a column for each data item that appears in both the query and the layout. Grouping applied in the report layout is also applied to the tabular data.

Correct Answer: A
