Following Questions and Answers are all new published by IBM Official
Exam Center

QUESTION 1

An international enterprise has planners in European, Asian, and North American regions. The enterprise wants to have planners in each region enter cube data into the local regional TM1 server but report globally on a daily basis from a single enterprise-reporting server located in Canada. The enterprise wants to integrate the cube data from the different regions into a single reporting server in Canada.

Which method accomplishes this goal?

A. Use the TM1 rules to push data from each regional server into the Canadian reporting server.

B. Use the TM1 rules to pull data from each regional server into the Canadian reporting server.

C. UsetheTM1 replication/synchronization in the Canadian server to pull data from the regional servers.

D. Use the TM1 replication/synchronization in the regional servers to push data to the Canadian server.

Correct Answer: C
