QUESTION 1

You are estimating the effort for the integration testing activities of a new project. Consider the following factors, which can affect that estimation:

I. Availability of re-usable test systems and documentation from previous, similar projects

II. Unexpected timing of components arrival

III. Stability of the integration test team (no turnover)

IV.

Many and geographically distributed sub-teams Which of the following statements is true?

A.

I. and II. can negatively affect the estimation

III. and IV. usually favor the accuracy of the estimation effort

B.

II. and III. can negatively affect the estimation and IV. usually favor the accuracy of the estimation effort

C.

II. and IV. can negatively affect the estimation and III. usually favor the accuracy of the estimation effort

D.

III. and IV. can negatively affect the estimation and II. usually favor the accuracy of the estimation effort

Correct Answer: C

QUESTION 2

The following are the requirements identified as "critical": REQ-SEL-001. The user shall be able to combine all the three products with all the four durations to define an item to purchase REQ-SEL-002. The user shall be able to add a maximum of six different items to the shopping cart REQ-PUR-001. The user shall be able to purchase all the items in the shopping cart using a credit voucher REQ-PUR-002. The user shall be able to purchase all the items in the shopping cart using the available credit already charged on the smartcard REQ-PUR-003. The user shall be able to purchase all the items in the shopping cart using all the accepted credit cards (Visa, MasterCard and Great Wall Card) REG-LOGO-001. The user shall be able to logout (by clicking the logout button) from both the "select" and "purchase" pages going back to the "browse" page (anonymous navigation) Moreover the following quality risk item has been identified as "critical": QR-P1. The web customer portal might not be able to provide the expected response time (less than 10 sec) for the purchase transactions under a load of up-to 1000 concurrent users Test analysis for system testing has just begun and the

following test conditions have been identified. TC-SEL-01. Test the combinations of products and durations to define an item to purchase TC-SEL-02. Test the maximum number of items, which can be added to the shopping cart TC-

PUR-01. Test the purchase of an item TC-PUR-02. Test the purchase of an item with the credit charged on the smartcard What is the MINIMUM number of test conditions that must be added to fulfill both the EXCR1 and EXCR2 exit criteria?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: C

QUESTION 3

You are the Test Manager of a new project aimed at developing a software system that must be certified at level B of the DO-178B standard. The project will follow a V-Model software development life cycle and it will have four formal levels

of testing: component, integration, system and acceptance testing.

You must produce the test plan documentation for this project by providing an adequate coordination across the four levels of testing in order to assure audit ability.

Which of the following answers would you expect to best describe how to organize the test plan?

- A. Produce a single master test plan that covers in detail all four levels, describing the particular activities for all test levels
- B. Produce a master test plan that covers three levels (component, integration, system test) and a separate acceptance test plan
- C. Produce a master test plan describing the relationship between the four levels, and four separate detailed level test plans, one for each level
- D. Produce four separate detailed level test plans, one for each level, without a master test plan

Correct Answer: C

QUESTION 4

You are the Test Manager for a project to develop a client-server application that allows wine vendors to order custom-assorted packages of wines of several winemakers to sell special packages in their wine shops.

You decide to apply a blended risk-based and reactive testing strategy. Below the exit criteria for the system testing.

EXCR1- Each "critical" quality risk item must be covered by at least one test condition

EXCR2- Each "critical" requirement must be covered by at least one test condition

The following are the "critical" requirements of the application:

REQ-SEL-1. The application shall allow the user to order only one package at a time

REQ-SEL-2. The application shall allow the user to select between four different packages (2- bottles, 6-bottles, 12-bottles, 15-bottles)

REQ-SEL-3. The application shall allow the user to order a package containing at least 1 bottle and no more bottles than the package size. No error messages shall be displayed if the user selects a valid number of bottles (at least 1 bottle

and no more than the package size)

REQ-SEL-4. The application shall display an error message "Invalid number of bottles" if an invalid number of bottles is selected by the user (zero bottles or a number higher than the package size)

REQ-PAY-1. The application shall allow the user to pay with the three accepted credit cards (Visa, MasterCard, American Express)

REQ-PAY-2. The application shall display an error message "Invalid credit card" if invalid credit card data are given by the user

Which of the following is a positive logical test that is complete and correct, and covers the REQ- SEL-4 requirement?

- A. Select a 6-bottles package, then try to insert 5 bottles; verify that no error messages are displayed
- B. Select a 6-bottles package, then try to insert 7 bottles; verify that no error messages are displayed
- C. Select a 6-bottles package, then try to insert 7 bottles; verify that the "Invalid number of bottles" message is displayed
- D. Select a 6-bottles package, then try to insert 7 bottles

Correct Answer: C

QUESTION 5

Which of the following statements describing the consequences of specifying test conditions at a detailed level is NOT true?

- A. In an environment where the test basis is continuously changing, it is recommended to specify test conditions at a detailed level in order to achieve a better maintainability
- B. The specification of test conditions at a detailed level can be effective when no formal requirements or other development work products are available
- C. The specification of test conditions at a detailed level can require the implementation of an adequate level of formality across the team
- D. For system testing, the specification of test conditions at a detailed level, carried out early in the project as soon as the test basis is established, can contribute to defect prevention

Correct Answer: A
