### QUESTION 1

Which of the following are valid reasons for adopting a different life cycle (from the V model), for increments after the first year? 2 credits

- i. We do not have a clear understanding of the requirements from a customer perspective.
- ii. We see the risk of delivering requested functionality late as being higher than the risk of delivering a lower quality product.
- iii. We do not have a budget for additional regression testing which is needed to ensure that existing functionality is not compromised by future iterations.
- iv.

The company test strategy does not fit well within the V life cycle model.

- A.  
(i) and (ii)
- B.  
(i) and (iv)
- C.  
(ii) and (iii)
- D.  
(ii) and (iv)

Correct Answer: A

---

### QUESTION 2

Which of the following would you expect to see in the master test plan? 1 credit

- A. A description of how the test cases are cross-referenced to requirements in the test management tool.
- B. A detailed identification of the resources that will carry out structural testing in the first iteration.
- C. The test approach that will be applied at system integration testing.
- D. A list of the names of the testers who will carry out the performance testing for the final iteration.

Correct Answer: C

---

### QUESTION 3

Identify THREE items that would be part of the work-breakdown structure showing the key testing activities for the acceptance test project. 2 credits (for 2 out of 3 correct 1 credit)

- A. Test planning, test case preparation and test execution for each of the four iterations
- B. Work should be explicitly allocated to test completion, test management, installation and to training on using the system
- C. Activities to deploy the system in the user environment
- D. Regression testing in the second, third and fourth iterations
- E. Development activities for unit and integration testing
- F. Reviews on requirements documentation
- G. Defining test environment requirements for system testing

Correct Answer: ABD

---

#### QUESTION 4

Consider the typical objectives of testing. Which of the following metrics can be used to measure the effectiveness of the testing process in achieving one of those objectives? 1 credit

- A. Average number of days between defect discovery and resolution
- B. Percentage of requirements covered
- C. Lines of code written per developer per day
- D. Percentage of test effort spent on regression testing

Correct Answer: B

---

#### QUESTION 5

Within the projects, a master test plan and phase test plan will be used. Following is a list of characteristics applicable for test plans:

- a.  
Any deviation from the procedures described in the test
- b.  
strategy document
- c.  
The overall estimated costs, timescales and resource
- d.

requirements

e.

A detailed schedule of testing activities

f.

The development deliverables to be tested

g.

Which test staff members (names) will be involved and when

h.

Level of requirements coverage achieved Which TWO of the above mentioned characteristics relate to the phase test plan? 1 credit

A.

a

B.

b

C.

c

D.

d

E.

e

F.

f

Correct Answer: CE Scenario 10, V3 "Online Application"

The cancellation of a current major development project has released resources. The development manager has decided to respond to his own request to tender and has proposed an in-house development with the use of a Rapid Application Development (RAO) approach.
