QUESTION 1

When maintaining the user distribution field selection (transaction SCUM), you can choose which of the following options? (3 are correct)

- A. Fixed
- B. Local
- C. Central
- D. Redistribution
- E. Global

Correct Answer: ACE

QUESTION 2

Which performance optimization tasks can be performed by configuring Automatic Table Maintenance (ATM) in DBACOCKPIT?

(Choose two)

- A. Archive tables based on thresholds.
- B. Perform complete online reorganization `REORG REBUILD\` of tables.
- C. Reorganize tables using row forwarding.
- D. Update index statistics.

Correct Answer: CD

QUESTION 3

For which purposes can property variants in CCMS monitoring be used? (Choose three)

- A. To enable cross-system monitoring
- B. To transport sets of threshold values from one SAP system to another SAP system
- C. To allow users to use different sets of threshold values at the same time
- D. To switch between different sets of threshold values triggered by a switch of the operation mode
- E. As containers for threshold values

Correct Answer: BDE

QUESTION 4

You are running a system landscape of AS Java-based SAP systems. You want to use the enhanced Change and Transport System (CTS) to transport non-ABAP objects into these systems.

Which prerequisites are necessary to perform this task? (Choose two)

- A. The Software Deployment Manager (SDM) of the Transport Domain Controller must be configured for deployment in AS Java-based runtime systems.
- B. Client-dependent transport routes must exist for all SAP systems in your transport domain.
- C. The transport landscape for AS Java-based SAP systems must be maintained in transaction STMS in the Transport Domain Controller.
- D. The AS Java-based SAP systems and the Transport Domain Controller must have the same SAP release level.
- E. An RFC destination to the CTS Deploy Web Service must be configured on the AS ABAP-based Transport Domain Controller.

Correct Answer: CE

QUESTION 5

Which options do you have for selecting transport requests to be imported? (Choose four.)

- A. You can filter transport requests from a certain project and import them together in one step (provided that you have activated the CTS functionality in transaction SPRO_ADMIN).
- B. You can import a single transport request into several SAP Systems, for example, QA1 and QA2, in one step.
- C. You can select several individual transport requests to be imported in one step.
- D. Depending on the TMS settings, you can use the 'import all' button to import all importable requests from the import queue in one step.
- E. You can select a single transport request for import.

Correct Answer: ACDE
