QUESTION 1

Using SAPDOCCD.ini, you have several options for changing the way online documentation is accessed. Which of the following statements are true? (Choose three)

A. You can change the access path to online documentation, depending on the release of the SAP system from which help is being called.

B. You can change the access path to online documentation, depending on the user ID (in the SAP system) of the user calling help.

C. You can change the access path to online documentation, depending on the logon language (in the SAP system) of the user calling help.

D. You can change the access path to online documentation, depending on the SID (System ID) of the SAP system from which help is being called.

Correct Answer: ACD

QUESTION 2

What consequences has the use of "native SQL" in ABAP programs written by customers?

A. Loss of database independence for these programs

B. No buffering of table content on the SAP application server

C. No lock handling by the enqueue work process

D. The use of native SQL always results in poor performance

Correct Answer: AB

QUESTION 3

The customer has decided to implement a three system landscape for SAP ECC 6.0. A lot of customizing and development work must be done before the SAP landscape goes live. Someone has recommended using virtual systems in the beginning, instead of buying physical hardware. Which statements regarding virtual systems are true? (Choose three)

A. Virtual systems are used to save money in the beginning of a project. Another side-effect is that the productive SAP system can always be installed on the newest hardware technology.

B. Virtual systems are mainly used to simulate the correctness of transport routes.

C. The of the virtual system should be the same as the planned physical system.

D. Virtual systems are used in the transport environment like physical systems. Transport buffers, command files and data files are created.

E. Virtual systems in the SAP transport environment are only used together with hypervisor technologies from different

third-party vendors.

Correct Answer: ACD

QUESTION 4

In which of the following scenarios is RFC communication used as the standard communication method in SAP systems? (Choose three)

A. RFC communication is used for transferring monitoring data between SAP systems.

B. RFC communication is used for exchanging information between the ICM process and a web browser.

C. RFC communication is often used for exchanging business data between different SAP systems.

D. RFC communication is used for exchanging user data between AS ABAP-based SAP systems and the LDAP connector.

Correct Answer: ACD

QUESTION 5
