QUESTION 1

You have created a message mapping using drag and drop from the source to the target element. When testing the mapping by entering a single value for the source element, you notice that the target element has been created with 3 occurrences. Each target element occurrence is filled with the same value as the source element.

What could be the reason for this behavior?

- A. The data type for the source element has the occurrence property maxOccurs=3.
- B. The data type for the source element has the occurrence property minOccurs=3.
- C. The data type for the target element has the occurrence property maxOccurs=3.
- D. The data type for the target element has the occurrence property minOccurs=3.

Correct Answer: D

QUESTION 2

Which of the following configuration objects can you use to activate XML validation of a message payload in SAP NetWeaver Process Integration? (Choose three)

- A. Integrated configuration
- B. Interface determination
- C. Receiver agreement
- D. Receiver determination
- E. Sender agreement

Correct Answer: ACE

QUESTION 3

In which cases do you need to use ccBPM processes? (Choose two)

- A. When collecting messages
- B. When querying databases
- C. When using a synchronous/asynchronous bridge
- D. When using scenarios that are based on an AEX installation

Correct Answer: AC

QUESTION 4

Which modeling environments does Enterprise Services Repository offer in SAP NetWeaver Process Integration?
(Choose two)

- A. Visual Composer
- B. Unified Modeling Language (UML)
- C. Process Integration scenario
- D. Business process modeling notation (BPMN)
- E. Process Component Architecture Model

Correct Answer: CE

QUESTION 5

After you have activated an integration process, you check the transaction SXI_CACHE. A return code is displayed for your integration process that is unequal to 0. What do you check to solve this issue? (Choose two)

- A. Whether the status of the process signature is set to incomplete
- B. Whether the activation log file contains error messages
- C. Whether the Customizing is complete (transaction SWF_XI_CUSTOMIZING)
- D. Whether the event trace is switched on (transaction SWELS)

Correct Answer: BC
