QUESTION 1

Which of the following statements is true of the star schema of InfoCubes in SAP NetWeaver BI? (Choose three)

A. Characteristic values are stored hierarchically in dimension tables.

B. Master data information is stored outside the dimension tables.

C. The SID table represents the connection between the master data and dimension tables.

D. SID technology simplifies the sharing of master data.

E. Characteristic InfoObject master data must always be stored in dimension tables.

Correct Answer: BCD

QUESTION 2

Which of the following are true concerning conceptual layers in Data Warehousing? (Choose two)

A. The Operational Data Store layer consists of the processes that manage data within and across the data warehouse and data marts. It is mainly used for backup and recovery, and reloading data.

B. The Persistent Staging Area layer is the central point of data integration in the Data Warehouse. It delivers a common and historic view of enterprise data.

C. The Data Warehouse layer is a subject-oriented, integrated and non-volatile collection of data. It is the source of data for the data marts, delivering a common view of enterprise data.

D. The Data Mart layer is customized and/or summarized data derived from the data warehouse and tailored to support the specific analytical requirements of a business unit or function.

Correct Answer: AC

QUESTION 3

If two queries are inserted into the same worksheet in a workbook, which of the following is a potential conflict?

A. The results for one query could affect the results for the other query.

B. The first query on the worksheet is the only query accessible by the user.

C. If the user drills down in the first query, the query result could possibly extend into the area occupied by the second query.

D. The security settings of the first query would override the security settings of the second query.

Correct Answer: C

QUESTION 4

For a query definition... (Choose two)

A. ...a DataStore Object can be selected as the InfoProvider

B. ...more than one InfoProvider can be selected at the same time.

C. ...the InfoProvider selection can be determined at query runtime.

D. ...a MultiProvider can be chosen as the InfoProvider.

E. ... only InfoProviders assigned to your role can be used.

Correct Answer: AD

QUESTION 5

When should VirtualProviders based on Data Transfer Processes be used? (Choose three)

A. When real-time data is needed from source systems.

B. When only small data volumes are transferred to the queries.

C. When a query is executed several times a day by many users.

D. When the query is executed by only a few users at the same time and the data volume required is low.

E. When the query requires large data volumes.

Correct Answer: ABD
