QUESTION 1

You are preparing to create the required objects as the 1st phase of your Integrated Planning project. Which of the following are correct options? You can: (Choose three)

A. Build an aggregation level directly on a Real Time InfoCube.

B. Build an aggregation level on a MultiProvider. The MultiProvider could contain a basic InfoCube with actual data, and a Real Time InfoCube with plan data.

C. Build an aggregation level on a MultiProvider that contains another aggregation level.

D. Use an aggregation level as an InfoProvider in a MultiProvider.

Correct Answer: ABD

QUESTION 2

Which definition best describes a "Bookmark"?

A. A URL which links to a predefined navigation state of a BI Web Application.

B. A Microsoft Excel VBA link to a predefined navigation state of a BEx Analyzer report.

C. A pointer used to highlight data by color codes on a BI Web Application.

D. A pointer used to highlight data by color codes on a BEx Analyzer report.

Correct Answer: A

QUESTION 3

Characteristic value variables...

A. ...are created in the query definition and are therefore only available in that query definition.

B. ...are created for a characteristic in the query definition and are available for all query definitions of the same InfoProvider.

C. ...are created for a characteristic in the query definition and are available for all query definitions of InfoProviders containing this characteristic.

D. ...can be created for global use on an InfoProvider level, and can be created for local use in the query definition.

Correct Answer: C

QUESTION 4

Which of these statements about the delta queue are correct? (Choose two)

A. The delta queue extraction can be repeated after problems in the data loading process.

B. Delta intialization of a DataSource is required before the delta queue can be used.

C. With the replication of delta-enabled DataSources for transaction data, the functions of the delta queue can be used.

D. The Delta Queue is the central source for delta data when using a data transfer process.

Correct Answer: AB

QUESTION 5

Which of the following statements are true concerning direct access by queries to data in source systems? (Choose two)

A. Direct access is possible for transaction data (using VirtualProviders) as well as for master data.

B. Direct access has to be enabled in the BEx Query Designer.

C. Direct access is possible for DB Connect, UD Connect, File and selected SAP source system DataSources only.

D. Direct access is possible for UD Connect and selected SAP source system DataSources only.

Correct Answer: AC
