QUESTION 1

Which SAP NetWeaver component realizes cross-system application processes?

- A. SAP Exchange Infrastructure (SAP XI) / SAP Process Integration (SAP PI)
- B. SAP Enterprise Portal (SAP EP)
- C. SAP Master Data Management (SAP MDM)
- D. SAP Business Warehouse (SAP BW)

Correct Answer: A

QUESTION 2

What are the consequences when you change the payer at header level in a sales order? (Choose two)

- A. Any additional sales order items are given the payment terms for the new payer.
- B. The partner function "Payer" is changed in the sold-to customer master.
- C. Receivables resulting from the sales order are posted to the new payer.
- D. The billing document (invoice) is automatically sent to the new payer.

Correct Answer: AC

QUESTION 3

According to the system there is no stock available, but you still receive a confirmed schedule line in the sales order.

What is the reason for this confirmation?

- A. The availability check that was carried out included a replenishment lead time in the scope of check.
- B. The system automatically searches other plants for inventory and transfers this inventory to the plant with zero inventory in the sales order.
- C. The availability check was carried out, and on saving, the system immediately rescheduled the sales order according to the customer priority.
- D. Inventory Management creates a stock transfer when the sales order is saved.

Correct Answer: A

QUESTION 4

Which of the following statements regarding the bills of material (BOM) in the sales order are correct? (Choose two)

- A. Bills of material are maintained as master data. The bill of material is flagged as "BOM usage sales and distribution".
- B. The depth of the explosion of bills of material in the sales document is controlled by specifying the explosion level in the master record for the bill of material.
- C. The sales document type controls whether bills of material relevant to sales are to be exploded in the sales document or not.
- D. Bills of material are exploded in the sales document as main items and sub-items based on the configuration of the main item category.

Correct Answer: AD

QUESTION 5

What is controlled by the configuration of the billing type?

- A. How account determination takes place
- B. Whether a billing plan is determined when using this billing type
- C. How the item category within the billing document is determined
- D. Whether order-related billing is supported when using this billing type

Correct Answer: A
