### QUESTION 1

What is the principal purpose of Spring's Security tag library? (Select one)

- A. To provide a mechanism for applying security to Spring Web Services
- B. To allow certain URLs to be tagged as requiring secure access
- C. To provide functionality in JSP pages, such as hiding certain sections based on roles
- D. To allow Spring Security to be applied to XHTML

Correct Answer: C

---

### QUESTION 2

Which of the following statements is true concerning Spring's HttpInvoker remoting protocol? (select one)

- A. HttpInvoker requires a web server to be running on the server
- B. HttpInvoker is a synchronous remoting mechanism
- C. The client invokes remote methods on the server using an HTTP POST
- D. All of the above

Correct Answer: D

---

### QUESTION 3

Given an ApplicationContext containing multiple bean definitions of a Java type "Foo", which of the following @Autowired scenarios will cause the ApplicationContext to FAIL to initialize? Assume that the ApplicationContext is configured to process the @Autowired annotations. (Select one)

- A. @Autowired public void setFoo(Foo aFoo) {}
- B. @Autowired private Foo foo;
- C. Both a and b
- D. Neither a or b

Correct Answer: C

---

### QUESTION 4

Which of the following statements about the FactoryBean interface is NOT true? (select one)

- A. A FactoryBean can be used to generate Spring beans of any type

- B. The Spring configuration will ALWAYS inject the instance of the FactoryBean implementation
- C. FactoryBean is a Spring interface
- D. Factory objects used in Spring do not necessarily have to implement the FactoryBean interface

Correct Answer: B

---

#### QUESTION 5

Which of the following statements about Spring's JUnit integration testing support is true? (select one)

- A. A new ApplicationContext is initialized and created for each test method
- B. To obtain references to the Spring bean(s) you want to test, you need to call `getBean()` on the ApplicationContext provided
- C. You can indicate which XML configuration files the test class will use to create the ApplicationContext
- D. All of the above

Correct Answer: C
