QUESTION 1

Which three requirements must you meet to install OMSA in a Red Hat Linux environment? (Choose three.)

- A. You must do a custom installation to support Linux.
- B. The running kernel must have loadable module support enabled.
- C. You must purchase the Linux version of OMSA.
- D. The "ucd-snmp" or "net-snmp" package that is provided with the operating system must be installed.
- E. You must be logged in as root.

Correct Answer: BDE

QUESTION 2

What is the benefit of ECC memory?

- A. provides redundancy by maintaining parity info on the DRAM to detect and correct single bit errors
- B. provides redundancy by allowing defective memory to be disabled
- C. provides speed improvements by allowing addressing to be set for the next access to the same DIMM, while data are being read from the previous access
- D. provides speed improvements by accessing memory in parallel

Correct Answer: A

QUESTION 3

A disk in a RAID 5 array has failed. Using Array Manager, which statement is true about rebuilding the data onto a replacement drive if a PERC 3/DC is in use?

- A. The replacement disk must be initialized before insertion.
- B. The rebuild operation will start automatically upon insertion of the replacement disk.
- C. The rebuild operation will start only after it is manually initiated.
- D. The replacement disk must be initialized after insertion.

Correct Answer: B

QUESTION 4

What is the intended mounting location for a 0U rack mount device in a Dell rack?

- A. in the mounting holes in the side walls of the rack
- B. in any of the 42U spaces available
- C. on the back doors of the rack
- D. at the top of the rack

Correct Answer: A

QUESTION 5
