QUESTION 1

Which two components of a CX700 array do the standby power supplies connect to? (Choose two.)

- A. The left and right power distribution units (PDUs)
- B. Storage Processor Enclosure (SPE)
- C. Disk Processor Enclosure (DPE)
- D. the first Disk Array Enclosure (DAE2-OS)

Correct Answer: BD

QUESTION 2

Which three statements are correct about using SnapView? (Choose three.)

- A. SnapView can take snapshots, or point-in-time copies of LUNs.
- B. SnapView can make clones, or 100% duplicate copies of a LUN.
- C. Snapshots can take mere seconds to create.
- D. Snapshots are volume-level and thus able to restore specific files.
- E. Snapshots may be created using theadmhost CLI utility.

Correct Answer: ABC

QUESTION 3

In which four ways is the CX700 enhanced compared to the CX500? (Choose four.)

- A. more CPUs
- B. more front-end ports
- C. more back-end HSSDC connectors
- D. larger cache memory
- E. larger capacity FC disks

Correct Answer: ABCD

QUESTION 4

Where on the Storage Area Network (SAN) should PowerPath be installed?

- A. on any device that accesses the SAN
- B. on each fabric switch
- C. on each host server
- D. on the storage array

Correct Answer: C

QUESTION 5

Which two statements about Storage Area Networks (SANs) are true? (Choose two.)

- A. SANs enable the sharing of storage resources via IP / Ethernet networking.
- B. SANs enable the sharing of storage resources across a high speed, low latency, Fibre Channel network.
- C. SANs provide block level I/O access to storage resources.
- D. SANs provide file level I/O access to storage resources.

Correct Answer: BC
