QUESTION 1

A company has asked you to develop a framework for assuring trust in the VDC. An assessment methodology is to be part of the framework.

Where should you look first for assessment criteria and methodologies?

A. Company mandate documents

B. International standards bodies

C. Internal IT department

D. Industry best practices

Correct Answer: B

QUESTION 2

A company is planning the backup strategy to be used after migrating separate physical systems into a consolidated virtual machine environment. They are considering migrating their existing traditional backup model into this virtual environment.

Where do the backup data collection operations occur?

A. On the SAN switch

B. On a separate host

C. On the virtual machine

D. On the storage array

Correct Answer: C

QUESTION 3

In an attempt to save money, the IT department of a midsize company is identifying opportunities for consolidation.

What are three valid approaches they could take?

A. Cloud application services, VDC, VMware

B. Commoditized hardware and software, outsource backups, isolate client groups

C. VDC, cloud, services

D. Services, servers, modular hardware

Correct Answer: C

QUESTION 4

An application executes code on a remote host while receiving keyboard and mouse input from the endpoint.

Which application virtualization architecture has been implemented?

A. Presentation

B. Thin install

C. Streaming

D. Thick install

Correct Answer: A

QUESTION 5

A small organization plans to migrate a critical application from a traditional, physical infrastructure to the first servers in their VDC. This will be one of several applications the organization plans to migrate over the next 2-3 years.

As this is a new VDC implementation, they have not yet realized any of the benefits of a fully virtualized infrastructure. They have retained an experienced consulting service to help them build a detailed migration plan.

Which migration strategy will they most likely use and why?

A. A phased approach, because they have planning assistance that may be cost sensitive.

B. A forklift approach, because they have new servers available and can move small sections of the environment at a time.

C. A phased approach, because they can keep the existing systems online in parallel with the new systems.

D. A forklift approach, since it is less expensive than a phased approach and existing systems can be maintained online in parallel.

Correct Answer: A
