QUESTION 1

What is the primary bottleneck in text classification?

- A. The availability of tagged training data.
- B. The ability to parse unstructured text data.
- C. The high dimensionality of text data.
- D. The fact that text corpora are dynamic.

Correct Answer: A

QUESTION 2

The average purchase size from your online sales site is \$17, 200. The customer experience team believes a certain adjustment of the website will increase sales. A pilot study on a few hundred customers showed an increase in average purchase size of \$1.47, with a significance level of $p=0.1$. The team runs a larger study, of a few thousand customers. The second study shows an increased average purchase size of \$0.74, with a significance level of 0.03. What is your assessment of this study?

- A. The change in purchase size is not practically important, and the good p-value of the second study is probably a result of the large study size.
- B. The change in purchase size is small, but may aggregate up to a large increase in profits over the entire customer base.
- C. The difference in the change in purchase size between the two studies is troubling; The team should run another, larger study.
- D. The p-value of the second study shows a statistically significant change in purchase size. The new website is an improvement.

Correct Answer: A

QUESTION 3

What is a core deliverable at the end of the analytic project?

- A. An implemented database design
- B. A whitepaper describing the project and the implementation
- C. A presentation for project sponsors
- D. The training materials

Correct Answer: C

QUESTION 4

You have completed your model and are handing it off to be deployed in production. What should you deliver to the production team, along with your commented code?

- A. The production team needs to understand how your model will interact with the processes they already support. Give them documentation on expected model inputs and outputs, and guidance on error-handling.
- B. The production team are technical, and they need to understand how the processes that they support work, so give them the same presentation that you prepared for the analysts.
- C. The production team supports the processes that run the organization, and they need context to understand how your model interacts with the processes they already support. Give them the same presentation that you prepared for the project sponsor.
- D. The production team supports the processes that run the organization, and they need context to understand how your model interacts with the processes they already support. Give them the executive summary.

Correct Answer: A

QUESTION 5

You have been assigned to run a linear regression model for each of 5,000 distinct districts, and all the data is currently stored in a PostgreSQL database. Which tool/library would you use to produce these models with the least effort?

- A. MADlib
- B. Mahout
- C. R
- D. HBase

Correct Answer: A
