QUESTION 1

A customer is planning to consolidate their backup environment using EMC NetWorker and Data Domain with replication. The customer\\'s WAN is managed by a third-party and firewall exceptions must be requested in advance.

Which protocol and port number does Data Domain use for replication?

A. Data Domain proprietary protocol, port 2051

B. Secure File Transfer protocol, port 22

C. Secure File Transfer protocol, port 2051

D. Secure Shell protocol, port 22

Correct Answer: A

QUESTION 2

You are having a preliminary discussion with a prospective customer. The customer would like to know the deduplication rates that are typically seen when running initial EMC Avamar backups for file system and database data.

Which information should be provided to the customer?

A. File system = 20%; database = 80%

B. File system = 50%; database = 50%

C. File system = 70%; database = 35%

D. File system = 80%; database = 20%

Correct Answer: A

QUESTION 3

An EMC Avamar customer is running a backup that is being written to a Data Domain system. The Data Domain cleaning runs at 8 M. on Tuesday mornings. Avamar maintenance runs daily at 6 M. A backup has completed successfully; however, it is no longer needed. The customer manually deletes the backup on Wednesday afternoon.

When is the first opportunity for space to be reclaimed on the Data Domain system?

A. At the next Data Domain file system cleaning

B. Immediately on the Data Domain system

C. At the next scheduled Avamar garbage collection

D. When manually deleted from the Data Domain system

Correct Answer: A

QUESTION 4

During final design conversations with an EMC Avamar customer, they indicate that they have certain data

that needs to be carefully secured during transit. This data is typically transferred at different times and in

different groups.

Which type of encryption would address the customer\'s concern?

A. Blowfish encryption enabled at the group policy level

B. AES-256 encryption automatically enabled for all backups

C. AES-256 encryption set at the time of the backup operation

D. AES-128 encryption set at the time of server installation

Correct Answer: C

QUESTION 5

A Symantec Backup Exec customer purchased an EMC Disk Library (EDL) last year and performs 1.5 TB of nightly
backups. Backup Exec is used to copy EDL virtual tapes to physical tapes to satisfy offsite requirements. The daily
backup and tape copying workload is becoming a challenge for their Backup Exec server.

The customer is exploring EDL-to-EDL replication to a second a second site seven miles always to eliminate physical
tape and reduce the Backup Exec server workload. Which EDL relocation option meets the customer\'s requirements?

A. Remote Copy over an IP connection

B. Consolidated Media Management over extended Fibre Channel

C. Tape Caching over extended Fibre Channel

D. Auto Archive over an IP connection

Correct Answer: A
