### QUESTION 1

A new customer has expressed interest in upgrading their FCIP infrastructure. Currently their regional office supports over 180 users. They would like to obtain storage media encryption capability and eventually add RecoverPoint.

Which solution would you recommend?

- A. MDS-9506 with the multi-services switching module
- B. MDS-9506 with the storage services module
- C. MDS-9509 with the storage services node
- D. MDS-9509 with an MDS 48-port FC module

Correct Answer: A

---

### QUESTION 2

Which hardware component is used to offload iSCSI and TCP processing from the host CPU?

- A. iSCSI host bus adapter (HBA)
- B. Dual NICs
- C. NIC TCP Off-load Engine (TOE)
- D. NIC

Correct Answer: A

---

### QUESTION 3

While performing an NDU what must be done to bypass a rule check?

- A. Enable Engineering mode.
- B. Log in as a Global user.
- C. Log in as a Local User.
- D. Verify FLARE code is committed.

Correct Answer: A

---

### QUESTION 4

Use the calculator.

A customer has an application that processes large graphics files. The application reads raw graphical data, writes temporary files that are the size of the original data, and overwrites the temporary files with final data that is the same size as

the original data.

The remaining temporary data is then deleted. The 800 GB data LUN has a single SnapView session, which is started before processing begins, and is removed after processing ends.

If the original data for a given run was 250 GB in size, how much space is required in the reserved LUN pool?

- A. 255 GB
- B. 375 GB
- C. 510 GB
- D. 755 GB

Correct Answer: A

---

#### QUESTION 5

According to EMC best practices what is the recommended cache page size for mixed environments?

- A. 8 KB
- B. 16 KB
- C. 32 KB
- D. 64 KB

Correct Answer: A
