QUESTION 1

A customer is upgrading their EMC Isilon nodes as part of a technology refresh. The nodes to be replaced cannot be upgraded to the later version of OneFS that is required by the newer nodes.

What refresh process is appropriate in this case?

A. Use SyncIQ to migrate the data from the old cluster to the new cluster

B. Add the new nodes to the existing cluster and use SmartPools to migrate the data

C. Add the new nodes one at a time and SmartFail out the old nodes

D. Downgrade the new nodes to the version of OneFS running on the old nodes

Correct Answer: A

QUESTION 2

An EMC Isilon administrator is attempting to limit disk usage and control the visible capacity of a share to SMB clients. Which quota type gives the administrator this ability?

A. Hard quota on Directory

B. Hard quota on Group

C. Soft quota on Directory

D. Soft quota on User

Correct Answer: A

QUESTION 3

What is the recommended method when cabling an Isilon cluster with dual InfiniBand switches?

A. All int-a InfiniBand switch ports should be connected to one switch and all int-b ports should be cabled to the second switch.

B. All internal switch ports on odd-numbered nodes should be attached to switch one and all even-numbered nodes should be cabled to switch two.

C. All int-a switch ports should be cabled to the top row of switch ports on switch one and all int-b ports should be cabled to the bottom row of ports of switch one. Once switch one is full, continue cabling on switch two.

D. It does not matter which switch ports are used. Any internal switch port can be cabled to either of the InfiniBand switches.

Correct Answer: D

QUESTION 4

What does auditing keeps track of?

A. Data that is accessed, modified, created, and deleted

B. Jobs that are scheduled, modified, created, and deleted

C. Data that is backed up, restored, created, and deleted

D. Jobs that are running, stopped, paused, and resumed

Correct Answer: A

QUESTION 5

Before deploying a new EMC Isilon cluster you decide to confirm the details of the installation with the customer. The customer would like to make a change to the access zones in the configuration guide.

What should you do first?

A. Contact the design team

B. Update the configuration guide

C. Contact EMC change control

D. Collect system configuration

Correct Answer: A
