### QUESTION 1

How is the combination of an IP address and a Transport port number defined?

- A. Full port
- B. Slot
- C. Socket
- D. Specific port

Correct Answer: C

---

### QUESTION 2

A new DNS server has been added to the current domain. How do you add the new server to the Data Mover in Unisphere?

- A. On the DNS tab of the Network Settings, add the new server's IP address to the current DNS domain.
- B. On the DNS tab of the Network Settings, create a new domain with the server's IP address.
- C. On the NIS tab of the Network Settings, create a new domain with the server IP address.
- D. On the NIS tab of the Network Settings, add the new server IP address to the NIS domain.

Correct Answer: A

---

### QUESTION 3

There is a conflict between a locally established auditing policy of a Data Mover's CIFS server and the OUs GPO in a customers domain. Which policy will take precedence?

- A. Domain policy is used
- B. Locally configured policy
- C. Most restrictive policy
- D. Policy specified by the GPO

Correct Answer: C

---

### QUESTION 4

A UNIX client mounts a file system presented by the Celerra. Which name resolution is valid?

- A. CIFS

- B. NFS
- C. NIS
- D. WINS

Correct Answer: C

---

#### QUESTION 5

A Celerra file system has a SnapSure schedule enabled for daily checkpoints. By using the Microsoft Shadow Copy Client, a user can see previous versions of a certain file up to a certain date in the past, but nothing else after that.

What could be the cause of this issue?

- A. The SavVol has reached a full state.
- B. Checkpoints are currently being used by an application.
- C. All of the checkpoints have been refreshed.
- D. There have been no changes to the file.

Correct Answer: A
