### QUESTION 1

After adding LUNs to a storage group for a newly attached SAN host, the host cannot access any of the LUNs. When looking at the Unisphere Host Initiators page to verify connectivity, the storage group listed for the host is ~management.

Which step was missed when provisioning this host?

- A. Adding the host to the storage group
- B. Assigning host IDs to the LUNs
- C. Manually registering the host initiators
- D. Setting the correct failover mode for the host initiators

Correct Answer: A

---

### QUESTION 2

A customer has an application that uses a small amount of capacity but has very high performance requirements. The customer initially configured the LUNs using the Highest Available Tier option and now wants to configure the FAST VP policy to ensure LUNs allocated to this application always stay on higher performance storage.

What do you advise?

- A. The policy should be set to Highest Available Tier.
- B. Initially set the policy to Lowest Available Tier, then Auto-Tier.
- C. The policy should always be set to Auto-Tier.
- D. Initially set the policy to Highest Available Tier, then Auto-Tier.

Correct Answer: A

---

### QUESTION 3

How many clones can be created from a single source LUN?

- B. 4
- C. 8
- D. 16

Correct Answer: C

---

**QUESTION 4**

Refer to the Exhibit.

What type of DAE is in the picture?

- A. DAE5S
- B. DAE6S
- C. DAE7S
- D. DAE3S

Correct Answer: A

---

**QUESTION 5**

What action must be taken so the VNX can securely discover and display VM details?

- A. Install EMC Virtual Storage Integrator on the VM
- B. Load a non-MD5 signed certificate from vCenter
- C. Install Unisphere Host Agent on each VM
- D. Configure ESX Server connections to the correct initiator mode

Correct Answer: B
