### QUESTION 1

How many clones can be created from a single source LUN?

- B. 4
- C. 8
- D. 16

Correct Answer: C

---

### QUESTION 2

Which VNX Local Protection Suite offering uses journaling to track the changes?

- A. RecoverPoint CDP
- B. VNX Replicator
- C. VNX Snapshots
- D. RecoverPoint CRR

Correct Answer: A

---

### QUESTION 3

In an environment where VNX shares are mainly used by a Web Application Server, the administrator notices very high CPU load on the Antivirus servers used by CAVA. What could be the reason?

- A. TMP files are not excluded from scan
- B. LOG files are being scanned
- C. XML files are not excluded from scan
- D. There is just one CAVA agent running on the server

Correct Answer: A

---

### QUESTION 4

Which tool is used for scripting SnapView commands in a VNX system?

- A. Secure CLI
- B. Unisphere Service Manager
- C. Admsnap utility
- D. Snapsure software

Correct Answer: C

---

#### QUESTION 5

Which statement correctly describes a benefit of using a Virtual Data Mover (VDM)?

- A. It enables the replication of CIFS environments.
- B. It supports the separation of NFS exports.
- C. It can be configured as a standby for failover
- D. It provides security for users in multi-protocol environments

Correct Answer: A

Explanation:

## Virtual Data Mover Overview

- Feature that allows the separation of CIFS servers and their associated environment into virtual containers
- VDM virtual partitioning enables:
  - ▶ Separation of CIFS servers and their shares
  - ▶ Replication of CIFS environments
  - ▶ Movement of CIFS servers from one physical Data Mover to another
  - ▶ Separate point for user file systems to be mounted
- VDMs store dynamic configuration data such as:
  - ▶ Local groups
  - ▶ Shares
  - ▶ Security credentials
  - ▶ Audit logs
  - ▶ Home dir information
  - ▶ Kerberos
