### QUESTION 1

The TBO Implementation class of doc\_type\_a, which is a sub-type of dm\_document, extends DfDocument and overrides the doSave() method. A new object type, doc\_type\_b, is inserted in the hierarchy between dm\_document and doc\_type\_a. Now, doc\_type\_a is a sub-type of doc\_type\_b. What is the outcome of creating an object of type doc\_type\_a, assuming the an\_attribute exists at the doc\_type\_b level?

- A. The value of an\_attribute is set to doc\_type\_A.
- B. The value of an\_attribute is set to doc\_type\_B.
- C. A ClassCastException is thrown as the doc\_type\_a TBO implementation class does not extend docTypeBTBO class.
- D. The value of an\_attribute is blank.

Correct Answer: B

---

### QUESTION 2

What should a single business object JAR contain?

- A. only interface OR implementation classes
- B. only interface AND implementation classes
- C. interface classes, implementation classes and any resources file needed
- D. a single manifest file that contains references to any relevant dmc\_jar objects

Correct Answer: A

---

### QUESTION 3

Given the following code: `IMyService1.createFolder()` and `IMyService2.createDocuments()` perform steps that can be aborted if in a transaction. Which statement is true?

- A. When `createDocuments()` method throws an exception, both `createFolder()` and `createDocuments()` methods are aborted.
- B. When `createDocuments()` method throws an exception, only `createDocuments()` method is aborted.
- C. When `createDocuments()` method throws an exception, `sessionManager.abortTransaction()` throws a `DfException` set to `DM_DFC_E_INVALID_OPER_ON_MANAGED_SESSION`.
- D. SBOs do not participate in transactions.

Correct Answer: A

---

### QUESTION 4

What effect does the freeze() method have on an assembly?

- A. Assemblies and their components are already frozen by default and freeze() is not needed.
- B. makes all the nodes of the assembly unchangeable without freezing the assembly document
- C. makes the assembly document unchangeable without affecting its components
- D. makes the assembly document and its components unchangeable

Correct Answer: D

---

#### QUESTION 5

What is the client process for redeploying an SBO stored in the global registry after updating the business logic of an SBO, but not the interface?

- A. copy the implementation classes to \$DOCUMENTUM/dba/java\_methods
- B. copy the interface classes to DOCUMENTUM/dba/java\_methods
- C. no intervention needed
- D. export the jar containing the interface and overwrite the local SBO interface jar

Correct Answer: C
