### QUESTION 1

What is the purpose of having Documentum Messaging Server (DMS) in a distributed configuration environment?

- A. It is required for asynchronous write which speeds up content access for Branch Office Caching Services (BOCS) users.
- B. It reduces email notification load on the Content Server since DMS handles all email messaging for the Content Server.
- C. It improves the content read operations at remote clients since it synchronously fetches content for them.
- D. It improves the content read operations at remote clients since it asynchronously fetches content for them.

Correct Answer: A

---

### QUESTION 2

Users experience slow performance while accessing their Documentum Inbox. Which tool should be run to solve this issue?

- A. DMClean
- B. Queue Management
- C. Audit Management
- D. Delete Database Statistics

Correct Answer: B

---

### QUESTION 3

Given an environment with multiple Connection Broker hosts and the following parameters in the dfc.properties file for a Documentum client: dfc.docbroker.auto\_request\_forward = T dfc.docbroker.search\_order = random Which statement is true about this environment?

- A. Communication requests from the client will be sent to the primary Connection Broker first. If that Connection Broker is unavailable, the secondary Connection Broker will be used.
- B. If the primary Connection Broker does not respond to the request, the communication request is immediately terminated and an error displayed.
- C. One of the defined Connection Brokers in the dfc.properties is chosen at random by the requesting client. If it does not respond, the communication request is immediately terminated and an error displayed.
- D. The client will randomly select any Connection Broker defined in the dfc.properties as the first recipient of the communication request.

Correct Answer: D

---

#### QUESTION 4

A manager wants to grant certain mobile team members access to confidential material that is handled differently, depending on the location of those members. Which Documentum feature satisfies this requirement?

- A. Network Locations
- B. Encrypted Storage Areas
- C. Dynamic Groups
- D. Folder Security

Correct Answer: C

---

#### QUESTION 5
