QUESTION 1

Where can an application developer enable tracing for Composer to monitor building or importing a project?

- A. dfc.properties
- B. log4j.properties
- C. Eclipse preferences
- D. composer.properties

Correct Answer: C

QUESTION 2

How should an application developer configure the task template so that it allows the end user to import the package content from the file system?

- A. Add a task attachment list control and configure the import setting.
- B. Add an embedded form for the package.
- C. Add a package control and configure the import setting.
- D. Configure the import option in process template and add a task attachment list control.

Correct Answer: C

QUESTION 3

How are the number of records returned in a result set for a BAM report limited?

- A. Use the TOP{n} keyword in the report query (where n is the number of rows).
- B. Set the max_returned_rows parameter in the dfc.properties for the BAM server.
- C. Set the maxRows parameter in the jdbc-config.xml for the BAM server web application.
- D. Set the MAX_ROWS initialization parameter for the BAM database.

Correct Answer: C

QUESTION 4

Form instances stored as XML content exist in a repository.

Which type of change to the form template would require a new version to be created to ensure that the existing form instances remain valid?

- A. re-arranging the UI controls on the form
- B. adding a calculation formula
- C. removing a data item
- D. adding an image on the form

Correct Answer: C

QUESTION 5

When a report dashlet is configured with a mandatory filter, what is the resulting behavior?

- A. The dashlet must be configured as the target of a single drill-down report.
- B. Default filter conditions are automatically applied to the dashlet's report results.
- C. The dashlet does not display results until the user selects a filter condition.
- D. The dashlet only displays results if its associated report has been configured with a filter.

Correct Answer: C
