QUESTION 1

You are proposing a storage solution using a VNX system. What will you tell the storage administrator about the default setting for VNX IP address filtering?

- A. Access is limited to a single Unisphere client.
- B. IP address filtering does not restrict any access.
- C. IP address filtering is not installed by default.
- D. IP address filtering prevents all communications until the VNX system is configured.

Correct Answer: B

QUESTION 2

A VNX is configured with a primary and a standby Data Mover. What happens to the file systems exported from the primary Data Mover if the connected network fails?

- A. The VNX file systems are unavailable.
- B. The VNX file systems remain available with degraded performance.
- C. The standby Data Mover takes over operation. After network connection is re-established, operation fails back.
- D. The standby Data Mover takes over operation. After network connection is re-established, operation will not fail back.

Correct Answer: A
