QUESTION 1

Your customer has observed a degradation in response time while browsing for media files within the Production Media folder of the Isilon cluster. That directory now contains over five million files. It was confirmed that there are no network or edit station related causes.

What changes to the Isilon cluster will best accelerate the browsing performance?

- A. Add Solid State Drives (SSDs) to the nodes
- B. Add A-Series Performance Accelerator nodes
- C. Upgrade node access to 10 Gbps
- D. Upgrade RAM on the nodes

Correct Answer: A

QUESTION 2

A customer created eight SyncIQ policies on a 6-node Isilon cluster. The policies all start at midnight. The customer is experiencing issues where several jobs are paused while others continue to run. This is delaying the overall replication of data.

What is the most likely reason for the pausing of some of the SyncIQ jobs?

- A. An Isilon cluster can only have five concurrent SyncIQ jobs running at the same time.
- B. An Isilon cluster can only have one SyncIQ job running at any one time.
- C. SyncIQ only allows one job per node. This cluster can only run six SyncIQ jobs concurrently.
- D. SyncIQ will stagger the start of all SyncIQ jobs. Jobs after the first job are delayed.

Correct Answer: A

QUESTION 3

Your customer has an existing Isilon cluster with seven X200 nodes. The cluster is used to store home directories and departmental shared folders. They are planning to deploy a new application that generates small block, synchronous writes.

Which OneFS 7 capability can help reduce latency for the new workload?

- A. Endurant Cache
- B. L2 Cache
- C. Solid State Drives
- D. Prefetcher

Correct Answer: A

QUESTION 4

Given a 5-node Isilon cluster configured with an N+2 protection level, how many nodes can be offline with the data accessible and fully writeable?

- A. 1
- B. 2
- C. 3
- D. None

Correct Answer: B

QUESTION 5

You will be meeting with the Corporate Security Team as part of the implementation planning for a new Isilon cluster deployment. The Lead Security Analyst has asked you to discuss the Authentication Sources on your Isilon Cluster.

What customer questions regarding Isilon-supported Authentication Sources do you need to be prepared to answer?

- A. What mechanism are you using for NFS authentication? Do you have multiple AD domain support? What versions of LDAP are supported?
- B. Are you using File Services for UNIX in your AD environment? Do you support NIS+ for NFS authentication? Do you support multiple Access Zones connecting to the AD Domain?
- C. What mechanism are you using for NFS authentication? Do you support Novell Directory Services? What flavor of LDAP is supported?
- D. Is the cluster x.400 compliant? What firewall rules are in place to prevent data leakage? Is there a audit trail for access zone configuration changes?

Correct Answer: A
