### QUESTION 2

You are designing a backup solution using an NDMP redirector and throttler. What is the default threshold percentage of CPU resources that the throttler limits NDMP to?

- B. 45
- C. 50
- D. 60

Correct Answer: C

### QUESTION 3

If business objectives such as value and SLAs are considered, which Isilon license feature provides the ability to manage performance and the cost of data in a cluster?

- A. SmartPools
- B. SmartConnect
- C. SynclQ
- D. SmartQuota

Correct Answer: A

---

### QUESTION 4

A customer plans to consolidate 200 TB of digital images and video content. Performance is important for recently

created files. However, the customer wants any content that has not been accessed within 30 days to be stored in the cluster at a much lower cost because performance is no longer critical. Which Isilon configuration should be recommended?

- A. X-Series nodes, NL-Series nodes, and SmartPools
- B. X-Series nodes and SmartQuotas
- C. S-Series nodes, X-Series nodes, and SmartPools
- D. NL-Series nodes and SmartLock

Correct Answer: A

---

#### QUESTION 5

A potential customer is considering replacing a four year old, Linux-based NFS server with 40TB of usable capacity. The existing system supports home directories, an internal website, and a content repository for the customer's content management system. The customer is concerned about performance of any new solution because they expect to double workload in the content management system.

What tools can be used to collect performance data needed to size the new solution?

- A. iostat and nfsstat
- B. Perfmon and sysstat
- C. Isi statistics and Wireshark
- D. Syslog and vmstat

Correct Answer: A

Reference: <http://agiletesting.blogspot.com/2009/11/nfs-troubleshooting-with-iostat-and.html>
