- A. During the NetWorker client installation
- B. Separately from the NetWorker client installation
- C. Prior to the first backup
- D. Prior to the first restore

Correct Answer: A

QUESTION 4

By default, which database is automatically deployed on the Data Protection Advisor server?

- A. MSDE

B. PostgreSQL

C. MySQL

D. Anywhere

Correct Answer: D

The DPA Server component is the core component of the product. The server manages all data stored within the system and provides the methods for the user to view data and to receive alerts. The Server component can run on either Solaris, Windows, or Linux. DPA can work with an embedded iAnyWhere database that is automatically installed on the server during the install process, or with an external database that must be supplied and managed by the customer. DPA supports the following external databases: ?Oracle in Solaris environments ?Microsoft SQL Server in Windows environments ?Oracle and PostgreSQL in Linux environments

QUESTION 5

What is the key benefit to implementing Symantec\\'s NetBackup OST with Data Domain systems?

A. Replication of data segments are inline

B. Media server is aware of all Data Domain systems

C. Data is ingested and replicated simultaneously

D. Data Domain system initiates and controls replication

Correct Answer: B
