QUESTION 1

What is one of the features available with VADP (vStorage APIs for Data Protection) in EMC NetWorker?

- A. Option to leverage change block tracking (CBT) feature.
- B. File level recovery is available from Linux image level .vmdk backups.
- C. Single Step VM Recovery to the original machine only.
- D. EMC NetWorker VADP proxy can be a physical server only.

Correct Answer: A

QUESTION 2

When backing up an Oracle database with EMC NetWorker Module for Databases and Applications, how is the Oracle backup level determined?

- A. Level specified in RMAN backup script.
- B. NSR_BACKUP_LEVEL parameter in NMDA configuration file.
- C. Level specified in EMC NetWorker Schedules resource.
- D. NSR_BACKUP_LEVEL parameter in RMAN backup script.

Correct Answer: A

QUESTION 3

A user on the EMC NetWorker client wants to initiate a backup of selected files. At a minimum, which components must be configured before the backup can succeed?

- A. Client resource, group resource, device resource, labeled volume for the device
- B. Save set, save group, schedule
- C. Client resource, device resource, clone resource
- D. Advanced file type device, client resource, labeled volume for the device, staging policy

Correct Answer: A

QUESTION 4

You are using NetWorker Management Console (NMC) to manage an EMC NetWorker server. You want to add a second data zone to your environment and monitor this data zone using the existing NMC. How can this be done?

- A. Add the second NetWorker server as a new host under the NMC enterprise hierarchy.
- B. Add the new NetWorker server to the servers file on the NMC host.
- C. Grant the console user role to the administrator of the new server.
- D. Select diagnostic mode in the NMC Setup window.

Correct Answer: A

QUESTION 5

You are logged in to your Windows-based EMC NetWorker server and are attempting to manually run a backup group on the EMC NetWorker Management Console. You are receiving an error when attempting to manually start the group.

What is the most likely reason for the error?

- A. Your user id does not have system administrator privileges.
- B. You cannot manually start backups from the EMC NetWorker Management Console.
- C. The backup group is disabled on the EMC NetWorker Server.
- D. You must run the group backup from the command line.

Correct Answer: A
