### QUESTION 1

A new Dell EMC NetWorker installation is being integrated with Active Directory for user authentication. Which command is used to create the relationship between NetWorker Authentication and Active Directory?

- A. nsraddadmin
- B. authc\_mgmt
- C. nsrauthtrust
- D. authc\_config

Correct Answer: C

---

### QUESTION 2

A Dell EMC NetWorker backup administrator has configured Data Domain Cloud Tier for long-term retention with ECS cloud. After setting up the data movement policy in NetWorker, the administrator discovers that the save set has not moved to their cloud even after cloning completed successfully.

What is a possible reason for this issue?

- A. Backup administrator does not have admin privileges on the Data Domain system
- B. Data movement policy has not yet run on the Data Domain system
- C. Data Domain does not have a replication license for managed-file replication
- D. ECS does not support an app-based policy for cloning using NetWorker

Correct Answer: B

---

### QUESTION 3

What is a characteristic of a Dell EMC NetWorker module backup?

- A. API determines what is included in the backup save streams
- B. Module-specific NetWorker backup command runs on the NetWorker server
- C. Backup data always goes through the storage node to the storagedevice
- D. Block based backups are used for all database backups with NetWorker

Correct Answer: C

---

#### QUESTION 4

An EMC NetWorker backup client contains 650 GB of data in 750,000 files and is presently being backed up by an EMC NetWorker server to a tape library with six tape drives connected to a Fibre Channel switch. Due to the total size of its data and the number of files, the backup cannot complete during the required backup window.

According to EMC best practice, how can this issue be resolved?

- A. Configure the client as a dedicated storage node and assign a tape device to the client.
- B. Add another storage node to the NetWorker environment distributing the load and bandwidth across the environment.
- C. Add four additional tape drives to the library.
- D. Increase the number of Fibre Channel ports into the SAN.

Correct Answer: A

---

#### QUESTION 5

Which tool is available to help determine and track source capacity usage in an EMC NetWorker environment?

- A. EMC AMP Utility
- B. EMC NetWorker License Manager
- C. nsradmin
- D. nsrlic

Correct Answer: A
